I am 71 years old and not influenced by keeping up with the Jones or AOL. I have been teaching the use of computers since 1988 and was thrilled when Netscape help drive the Internet, but I do not buy Edsels.

Internet Explorer works so much better now then Netscape, you wonder what AOLs programmers are doing.

AOL should be in court because of their blatant rejection of material from other services. You can not use their buddy system, even from the greatest Home Page "Yahoo." If you send video or photos outside of AOL you are very fortunate if they arrive. I constantly send Video and photos to my one Son who has the bad judgment to use AOL, those efforts rarely get delivered. My other three children seem to have no problem viewing my efforts.

My opinion on a company that is out of control (I assume because they think they are GOD) has to be AOL.

I am pragmatic, I had AOL for five years, I now use AT&T. If Netscape and AOL were better they would be on my computer.

When you go on-line with AOL & CS, you are not on the Internet, you are on AOL & CS. AT&T, Earthlink, Juno you are on the Intetnet. SO? it means AOL is not faster, it also means they control the content on your home page. You pick the content on other servers, not the choices AOL gives you.

INTERNET EXPLORER WORKS BETTER AND THE UPGRADES ARE FREE

This is supposed to be about the public, not AOL, Correct?
